

# Take on the World

[Tad Morose](#)

Come join the circuitry it's me  
Yes I've left the old ways, roaming free  
Let us reach out one more time  
Raise our banners, hold 'em high This is your one chance to be free  
So shout it out! Yeah! Leave me be  
For all we know all hell might freeze  
It makes no difference don't you see  
Just set us free... We shake the ground  
Break up the clouds  
Take on the world  
Let it roll  
In a different time  
We made the sign  
Shook the world  
Let it roll Take your chances, spin the wheel  
Too much pressure, here's the deal  
For all we know all hell might freeze  
It makes no difference don't you see  
Just set us free...
