# Friends Like You

## Sick of It All

Call me a friend but you stab me in the back
You pretend we get along, just an act
You always use people to get what you need
You take advantage of others to satisfy your greedAll you do is take and you never once give
Don't you have any shame? The life that you live
We don't need you, you fucking scum
Friends like you will never comeThings turn bad for you, don't count on me
'Cause I'll turn my back on you as you did to meWe don't need friends like you
We don't need friends like you
We don't need friends like you
We don't need friends like youCall me a friend but you stab me in the back
You pretend we get along, just an act
You always use people to get what you need
You take advantage of others to satisfy your greedAll you do is take and you never once give
Don't you have any shame? The life you liveLike you
