Stick Around

Sweet Soubrette

I can make you a believer in fate
Divine intervention and signs of the sun
You came to me not a moment too late
With death at my door and time on the run
And destiny surrounds you
But now that I've found you
I'm never gonna let you go
I'd be lost without you now
I'm never gonna let you go
You're the one sure thing I've found
So you better stick around
I can feel you from across the room
Laughing eyes are staring me down
You come to me not a moment too soon
Revealing your secrets without a sound
And mystery surrounds you
Baby, now that I've found you
I'm never gonna let you go
I'd be lost without you now
I'm never gonna let you go
You're the one sure thing I've found
So you better stick around
Night comes calling, you're with me now
And I'm at peace within my dreams
'Cause sometimes dreaming is wiser than waking
When nothing's ever as it seems
I'm never gonna let you go
I'd be lost without you now
I'm never gonna let you go
You're the one sure thing I've found
So you better stick around
You better stick around
Yeah, you better stick around
