

Nightless Night (Black Grass Remix)

Husky Rescue

I can't live in the city
Want to go back to the countryside
When I hang out in bikini, in moonlight I would die in the city
Rescue me to the nightless night
Girls and boys look so pretty with tan lines
Countryside, eternal light
The nightless night is on my mind
Countryside, tequila night
The countryside, the nightless night
Eternal light I feel all right
The countryside, I'm hypnotized, sunshine
I lost my mind, eternal light
I lost my heart in the countryside
My satellite, will you take me high to moonlight?
I lost myself to nightless night
I lost my love on the sweet moonlight
You turned the light, will you make me fly to sunlight?
The night is winning the city
The night is sweet in the countryside
Say goodbye to the city, say bye bye
I fall in love with the city
I'm making love with the countryside
The night's sweet like graffiti, starlight
The countryside, eternal light
The nightless night is on my mind
Countryside, tequila night
Countryside, the nightless night
Eternal light I feel all right
The countryside, I'm hypnotized, sunshine
I lost my mind, eternal light
I lost my heart in the countryside
My satellite, will you take me high to moonlight?
I lost myself to nightless night
I lost my love on the sweet moonlight
You turned the light, will you make me fly to sunlight?
The super-fly will you take me high?
You take me face when the sun will shine
You take me down to your riverside to starlight
You take me up to the stars tonight
The universe in the all moon night
The countryside, the nightless night is sunshine
