Stellar

Overworld

Welcome to purgatory
(Pleased to meet you, come on in)
We have been waiting for you
(Brace for eclipse)
This night may be your last alive
(Join the neverending dance)
Each step moving slightly faster
(Lose your mind before you lose your soul)One day we all must die
But as each one of us still linger on
We are stellarDance for me now, dance until you die
Dance for me, dance for me
Dance for me now, dance until you die
Dance for me, dance for me nowDance for me now, dance until you die
Dance for me, dance for me
Dance for me now, dance until you die
Dance for me, dance for meBreakdown
Break lifeOne day we all must die
Each one
Everyone of us still wandersAnd then the curtain call
And the show
And the show is in final act
We're still stellar
Yeah
Still stellarDance for me now, dance until you die
Dance for me, dance for me
Dance for me now, dance until you die
Dance the dance of deathDance for me now, dance until you die
Dance for me, dance for me
Dance for me now, dance until you die
Dance until you lose your mind
