High Horses

The Swell Season

There's a light inside us all
It only shines as bright as we are
And you've fallen down so low
I'm really worried for you, I'm really worried
And even on our worst days
We were never quite like this
We've gone as far as we can go
Without crashing
At the heart in every fool is the hope you're stupid too
And there's this lingering, this lingering feeling
That I'm missing something
I feel like I'm missing something
And even at your worst, babe
You were never as bad as this
You've gone as far as you can go
Without dying
