Instrument

Fugazi

That one is predetermined
That one, it finds another
This one comes in one window
Sliding out the other
We need an instrument to take a measurement
To find out if loss could weigh
We need to know value
We need to place value
In case it all comes true
Could it be loss could weigh?
It's always they that's dying
But now it's we that's dying
So sooner comes the trying to understand that loss could weigh
We've been dragged through the fire
We bragged about that fire
But suddenly we're tired
Could it be that loss could weigh?
Loss could weigh
