

Breakout

Cryoshell

Who are they to patronize?
Who is gonna sympathize? Come on
Cries are caving in the skies
Walls prepare to paralyze the pain Machines begin to mobilize
A systematic override, come on
The temperature begins to rise
Impossible to feel Break out
Acceleration of fear
Break out
From screams that no one can hear
Break out
Acceleration of fear
Break out
From screams that no one can hear I scout for phantoms in the night
The mercy game of wrong and right, come on
I calculate the sound of fright
Someone's gonna pay (Away) break out
Acceleration of fear
Break out (break away, break away...)
From screams that no one can hear
(Away) break out
Acceleration of fear
Break out (break away, break away...)
From screams that no one can hear (Who are they to patronize, patronize?...)
(Who is gonna sympathize, sympathize?...) Away
Break away, break away, break away
Away
Break away, break away, break away (Away) break out
Acceleration of fear
Break out (break away, break away...)
From screams that no one can hear
(Away) break out
Acceleration of fear
Break out (break away, break away...)
From screams that no one can hear
(Break out)
