

Come One, Come All

All Time Low

Come one, come all you're just in time
To witness my first breakdown
'Cause there's a mile gone for every minute passed
When I'm stuck in this town I've got a bone to pick with you, Mr. DJ
The traffic in this town is just as bad as it is in L.A. So go on and lock me up
You better throw away that key
Before I find out where you broadcast from
Because your playlist is killing me I'll change that station
Light it up like the 4th of July
It's me, I'm caller fifteen
Time to play my last request Come one, come all, you're just in time
To witness my first breakdown
'Cause there's a mile gone for every minute passed
When I'm wasting space in this town
Don't call the doctors, I don't need no medication
I just need one more vacation and make it last Hear me out please, judge and jury
I'm an innocent man
And it would be such a terrible injustice
To put me away without thinking about All the terrible mistakes
That goddamn radio jockey makes
I swear, he's out to get me
Oh, I swear he's out to get me I'll change that station
Light it up like the 4th of July
It's me, I'm caller fifteen
But it's too late for explanations
This broadcast will be your last Come one, come all, you're just in time
To witness my first breakdown
'Cause there's a mile gone for every minute passed
When I'm wasting space in this town
Don't call the doctors, I don't need no medication
I just need one more vacation and make it last Hear me out please, judge and jury
And I swear he's out to get me
Oh, I swear he's out to get me Go on and lock me up
You better throw away that key
And I swear he's out to get me
Oh, I swear he's out to get me I've got a bone to pick with you, Mr. DJ
You really oughta lock me up
Because your playlist is killing me Come one, come all, you're just in time
To witness my first breakdown

'Cause there's a mile gone for every minute passed
When I'm wasting space in this town
Don't call the doctors, I don't need no medication
I just need one more vacation and make it last
