

Night stalker

Useless ID

Wake up my friend,
Get ready for a night of the impossible.
Vampires on the loose
Crashing through the roof. Don't be afraid to lead the way
To the beyond of yesterday.
Bring me back to date
1988. So...
Where are you?
Where are you now?
What happened to our world,
Where there's so much we need to solve?
Where are you?
Where are you now?
What happened to our world,
Where there's so much we need to solve right now? Strange days ahead.
Coincidence is all we are, no evidence.
One more left to go
And we could be alone. Night stalker, sleepwalker.
Your days are numbered, twenty eight.
You could be normal.
It doesn't matter we're all anti-social. So...
Where are you?
Where are you now?
What happened to our world,
Where there's so much we need to solve?
Where are you?
Where are you now?
What happened to our world,
Where there's so much we need to solve right... now? We're the lost broken bones
We crawl out of our bodies.
We're the lost broken bones
We crawl out of our bodies into one,
Then fade until we're gone. So...
Where are you?
Where are you now?
What happened to our world,
Where there's so much we need to solve? Where are you?
Where are you now?
What happened to our world,

Where there's so much we need to solve right now?

Solve right now.

Solve right...
