

Antigravity

Starset

The more I fight, the more I work
The more I dig into the dirt
To be fed up, to be let down
To somehow turn it all around
But then fate knocks me to my knees
And sets new heights beyond my reach
Below the earth, below concrete
The whole world shackled to my feet
Then it falls away into the great escape
Over walls and weights
This anti-gravity taking over me
And far below, the carnivores,
Are looking up to where I soar
Above the clouds, above the storm
Above the earth I am transformed
The energy has set me free
And pulled me through the galaxy
I've risen up beyond the sky
I am awake, I am alive
As it falls away into the great escape
Over walls and weights
This anti-gravity
Let it fly through the universe
Into the outer space
Over walls and weights
This anti-gravity taking over me
I won't come down
If you wanna break free
You know where to find me
Anti-gravity
