

# The Heart of Darkness

## Catamenia

Frost came and took your heart of darkness  
You're lost, fear creeps in and let it start  
Night cracks the spine of dying day  
Fight but you can't make it go away Fill your soul with ravenous fire  
Kill the light and reborn for the light  
End up times among the pathetic lies  
Rise above the majestic life Open mind for a newfound world  
to be the part of our herd Follow us, the heart of darkness  
Follow us, no more mortal  
Come with us, the heart of darkness  
Follow us and you're free
