Where We Are

The Cuf Presents:

I've been away for so long
Riding on the range
Weak from wind and weak from fire
I can barely remember my name
But I know I know
I dry my head in the sun
All I have and all I've done
We've become so lonely

Where is love
Babe I hope it's where we are
And I'm back on the heels of a song
Back amongst the city centres
Seems I've been gone for so long
But I know, I know
Where is love?
I hope it's where we are
