

The Life

Decyfer Down

Drive tonight without anywhere to go
Or place to call my home
Looking till time I can see you
But never would feel you The tears fell every time you'd refuse me
This world always used me up inside
Never could find a true reason
To pass through the seasons Now I gotta move on and survive
Till I find the life Never again, I'm gonna leave all this behind
I've found a better life
Never again, believe me when I say my goodbyes
I gotta have the life I say goodnight to all that I thought I knew
Now I know what to do
Seeing the world for the first time
It won't be the last time Now I gotta move on and survive
'Cause I've found the life Never again, I'm gonna leave all this behind
I've found a better life
Never again, believe me when I say my goodbyes
I gotta have the life So scream in my face, you're already late
Now I can say this is all okay
You're beating me down, I'm standing my ground
Never gonna give in, won't break my pain Now I gotta move on and survive
'Cause I've found the life Never again, I'm gonna leave all this behind
I've found a better life
Never again, believe me when I say my goodbyes
I gotta have the life The life, the life
Gotta have the life, yeah
