

Your Face

The Modernaires

Oh yeah
Your face
I'm still not over, your face
Headlights break through the rain
Over London's winter light
I came all the way here tonight
To look in your eyes
I came all the way here tonight
Just to see you
Your face
Holds me over, your face
It wipes away the rain
Like a hundred summer skies
And every time I talk to you
It's like I'm alright
And every time I talk to you
I get a little closer to light
You are the face
That Heaven shown me
When I needed someone
Someone to love
And stay
You showed me

The quiet kind of love
Behind your face
Oh yeah, yeah, yeah, yeah, yeah
Your face
Let me show the world, your face
All the stars and suns above are jealous
It's a light
You steal the sky with them
Bring it aside
You steal the sky with them
Bring it to light
You are the face
That Heaven showed me
When I needed someone
Someone to love

Your face
You showed me
The quiet kind of love
Behind your face
Quiet kind of love
Behind your face
