

Nothing More Than a Body

Skating Polly

glass eyes are common
but mine are liquid
strange days will follow
glorified and over
hearts floating in outer space
I swear we saw it like yesterday
summers carousels are charmed things
my glass was sorry
I know that he tried to save
he was grasping my whole life fully
she told me not to worry
he is nothing more than a body
ooh warm candy in my eyes
like bird calls and Einstein
drinks milkshakes and roses
never thought I'd know him
I know that he tried to save me
he was grasping my whole life fully
she told me not to worry
he is nothing more than a body
screams once at people
amazing loves everything
now I know they owe me
I know that I tried
to make everything
now I know they owe me
I know that he tried to save me
he was grasping my whole life fully
she told me not to worry
he is nothing more than a body
he is nothing (nothing more than a body)
he is nothing more than a body
end.
