

Angelika

Devendra Banhart

Foolin on the human population
I know my mind's on the frontline
But when I'm lovin on the human population
Thank god my heart's playin it's part
One day one day at a time
Love is a birth of a nation
Born from the good womb of humankind
All these stories of creation
Came from the same flame of the most high
One song at a time
Hoarding on my human possessions
Never enough never too much
But when I'm sharing all my physical connections
Thank god my soul's back in control
One gift to give
Fearing Ohm sure getting better with every moan
a new fear is born
But when I'm trusting trusting knowing
That we're all in it together
Free to face unknown
Free to overcome
One day one day at a time
One day one day at a time
