

# Short Version

## WILD FLAG

Inside this stillness is a wave  
A force from which we won't be saved  
We shimmy in the light  
We shake it in the day  
But moonless nights  
Seem to find us anyway  
We're future ghosts without a grave  
Inside this heaven is a hell  
Beneath this fever we are well  
We twitch in the glory  
We twirl in the grace  
Ache to defy, outlast, be remade  
Saviors with nothing left to save  
If you want to thrill us  
Stop staring with your little frown  
When the feeling comes  
You gotta throw your weary body down  
Come and take a picture of the witch  
She's gonna seal your fate  
All the things you learn  
You learn just a little too late  
OK, alright  
If you want to live  
Stop staring with your camera eye  
When the feeling comes  
You know it's gonna pass you by  
Get level with the devil  
'Cause you know that he digs your sin  
It's all gonna end  
So we'll just begin again  
OK, alright  
OK, alright
