

Only Lovers Left Alive

The (International) Noise Conspiracy

You can choke on easy ways
While we stay up every night and every day
Doesn't matter what you say
'Cause your ways are so fucking lame Yeah, we're all coming over while you
Watch you take your pills, watch you fall asleep
Yeah, we're all gonna dig
The sound on the new beat There's no way that
Your gonna make it out of here in time
Only lovers
Only lovers gonna be left alive There's no way that
Your gonna make it out of here in time
Only lovers
Only lovers gonna be left alive Feel the heat that we are all taking about
A realization of the wildest schemes
Your lack of passion and your lack of dreams
Pretty much made you obsolete No more sitting down, shutting up
Taking shit, we could never dream of it
No more sitting down, shutting up
Taking shit, we could never dream of it Yeah, and we all gonna scream about it
Yeah, and the kids are finally gotta reign
Yeah, get rid of all the adults
'Cause they couldn't take the strain There's no way that
Your gonna make it out of here in time
Only lovers
Only lovers gonna be left alive There's no way that
Your gonna make it out of here in time
Only lovers
Only lovers gonna be left alive You can choke on easy ways
While we stay up every night and every day
Doesn't matter what you say
'Cause today your traditions are completely dead Yeah, and we're coming over
Yeah, old ways are going down
Yeah, dying of laughter
Yeah, while we dig the new sound
