

Raping the Earth

Extreme Noise Terror

"Man" is superior, "Man" has the might
he's under the impression he has the right
 to take the earth and do as he will
 and leave nothing but a deformed hell
 raping the earth and we don't seem to care
 soon there will be no life left here
 with such stupidity we are raping the earth
 it's been on the decline since man's birth
 the harmony of nature is being upturned
 compassion not destruction must be learned
