

Seems Like

Pheromone

It's getting cold
I'm docking in a shell again
From all to none
I'm falling down
I need to make it stop now I left my stress behind but I'm out of my mind
I left my feelings behind I'm still out of my mind
Don't stab, just help me Seems like there is one way
One way to heal my pain
Seems like there is one fear
You can make it disappear
Seems like you've got a choice
The only chance to vote
I'm waiting for your decision
Please
Help me get up from my knees One day I stop on a walking ground
And look into the rainy skies
I remember all of your lies
Seems like I was a stupid child
