Unknown

Rexxy

Just stay another night
Won't you come at the same time
Don't you leave me here tonight
All aloneAnd you said it all to me
I look at you, you look at me
Won't you tell me what to say
Don't you knowAll of the stars up in the sky, all know
They stay so brightAnd you stayed in bed all night
Won't you come with me tonight
Don't you tell me it's too late, that I know
And this way I see you're mine, for always in time
Our love will stand this time, that I knowStay with me now
stay with me nowAnd you tell me what to say
Would I know if it's too late?
I won't leave here till you say
That I know, I know
And it's simple what you got
To another I love not
for a simple company
Oh I know, I knowStay with me now
Stay with me now
What you tell me it's unknown
Lets take time, to realize
