

# Idiot Box

## Incubus

You keep your riches and I'll sew my stitches  
You can't make me think like you, mundane  
I've got a message for all those who think that  
They can etch his words inside my brain  
Inside my brain, oh yeahTV, what do I need?  
Tell me who to believe?  
What's the use of autonomy  
When a button does it all?  
When a button does it all?  
Does it all?So listen up, glisten up closely all  
Who've seen the fuckin' eye ache too  
It's time to step away from cable train  
And when we finally see the subtle light  
This quirk in evolution will begin  
To let us live and recreate, create againTV, what do I need?  
Tell me who to believe?  
What's the use of autonomy  
When a button does it all?TV, what should I see?  
Tell me who should I be?  
Lets' do our mom a favor and drop  
A new God off a wallLet me see past the fatuous knocks  
I've gotta rid myself of this idiot box  
Let you see past the feathers and flocks  
And help me plant a bomb in this idiot box  
From the depths of the sea to the tops of the trees  
To the seat of a lazy boy, staring at a silver screenTV, what do I need?  
Tell me who to believe?  
What's the use of autonomy  
When a button does it all?TV, what should I see?  
Tell me who should I be?  
Lets' do our mom a favor and drop  
A new God off a wall, wall
