

# Mistakes

## Madness

I don't know what to be It's not so easy to find out later  
About the necessary knowledge for survival  
You think you know enough to get you through life  
But find out too late of chances passed by An early start is not so important  
But timing is most essential  
Opportunity gone is gone forever  
You never know how much it could have been And once gone, gone forever  
You will find out to your cost A better use can be made of your time And don't think that life is easy  
You may never get a lucky break  
They'll put you down, cold and unknown  
A total failure from womb to grave
