Maximum Acceleration

Ultravox

I thought you knew me by now
Let the lights go on roaring
Someone's hand on my shoulder
Then whip past the turning point
There's time for the takingMaximum acceleration
Maximum acceleration
Maximum accelerationA face that goes slowly
A signal close by me
The landscapes are changing
And some of us flipped a coin
And shimmered awayMaximum acceleration
Maximum acceleration
Maximum accelerationYou really were aching
It's turning to twilight
Moving over and under
Then a couple of figures
Shook their heads of the high linesMaximum acceleration
Maximum acceleration
Maximum acceleration
