Protection

Bis

Stop me, it's a red light
Do the same for you, I guess you're right
Stare at me, head at an angle
Temporarily, extremely fragileCan't look, that's no surprise
Want a challenge? Try this for size
Read this book, opened it for you
Face so sheer you can see the whole way throughHere is my hand, don't let goFalling, pick me up
You asked what was up
You may not have much
But what you have is what I need
It's for my own protectionDeja vu, there's more of them
Motivation, get the chromium
Disgraced, it all comes out
Toleration, and I will come aroundThat was some revelation
No alternatives, can't have duplication
Acknowledgment, there is no time
With this sponsorship, this job just isn't mineHere is my hand, don't let go
Here is my handFalling, pick me up
You asked what was up
You may not have much
But what you have is what I need
It's for my own protectionProtection
Protection
Protection
