

It's A Little Too Late

[Mark Chesnutt](#)

Well, early this morning it dawned on me
The kind of man she needed me to be
She made a list and laid it there beside me on the bed
Now what I should've done, keeps running through my head
Oh I should've done this and I should've done that
I should've been there then she should've never left
I should've been hangin' on every word, she ever had to say
But it's a little too late, she's a little too gone
She's a little too right, I'm a little too wrong
Now would be a good time to change
But it's a little too late
Last night, I came home at a quarter till three
And to my surprise, she wasn't mad at me
I thought, she finally realized not to worry, I'd be home
And then, I realized this morning she was gone
Oh! I should've done this and I should've done that
I should've been there then she should've never left
I should've been hangin' on every word, she ever had to say
But it's a little too late, she's a little too gone
She's a little too right, I'm a little too wrong
Now would be a good time to change
But it's a little too late
But it's a little too late, she's a little too gone
She's a little too right, I'm a little too wrong
Now would be a good time to change
But it's a little too late
Not now would be the time to change
But it's a little too late
