Piece by Piece

Feeder

Sitting on a corner street
Children playing at my feet
See the smiles on ice cream faces
Feel myself begin to sink
As the wind blows through my skin

Leaves me open to temptation'Cause nothing ever lasts forever We're like flowers in this vase togetherYou and me, it's pulling me down

Tearing me down, piece by piece

And you can't see that it's like a disease

Killing me now, it's so hard to breatheSucking back a cigarette

Thinking about new regrets

Trying to be someone you'd like to be

Passing faces on the road

Where the hell can we still go?

Leaves us open to temptation'Cause nothing ever lasts forever We're like flowers in this vase togetherYou and me, it's pulling me down

Tearing me down, piece by piece

And you can't see that it's like a disease

Killing me now, it's so hard to breathe, it's so hard to breatheBut it's worth fighting for, it's still worth fighting

for

It's worth fighting for

'Cause nothing ever lasts forever

We're like flowers in this vase together, hereYou and me, it's pulling me down

Tearing me down, piece by piece

And you can't see that it's like a disease

It's killing me now, it's so hard to breathe You and me, it's pulling me down

Tearing me down, piece by piece

And you can't see that it's like a disease

It's killing me now, it's so hard to breathe
