

Everything Means Something

Pet Shop Boys

You said you're overreacting
You're reading too much into this
If you think this is important
Your sense of proportion has gone
I said, really?

Everything means something
And something has occurred
Everything means something
All other meaning can be blurred
You said we all can make mistakes
It doesn't matter that much
I said, really?

Everything means something
You see wrong our mistakes
Common sense means something
Not simple give you take

Everything means something
And something has occurred
Everything means something
All other meaning can be blurred
You said, oh don't be so pious
You're taking this all the wrong way
I said, really?

Everything means something
And something has occurred
Everything means something
All other meaning can be blurred
Everything means something
And something has occurred
Everything means something
All other meaning can be blurred
