

# Should've Never

Jennifer Lopez

I've been so caught up in the thought of me and you  
Even though I love someone else, I know my heart belongs to you  
Tell me how did we  
Ever let the situation get this far  
Maybe we should just  
Try to hide the things we feel inside  
Things I know we can't deny Should've never told you that I cared about you  
Didn't think that it would be so bad  
Should've never kissed you  
Should've never held your hand Gotta find a way to let these feelings go  
What did I do the day I let you slip into my soul (My soul)  
It was then, when I realized that I would always want you in my life (In my life)  
No one else, can know of the things that we were saying on the telephone  
It would be, so bad if they ever knew that me and you were secretly into each other Should've never told you  
that I cared about you  
Didn't think that it would be so bad  
Should've never kissed you  
Should've never held your hand Gotta find a way to let these feelings go  
Oh, I'm so scared, trembling inside 'cause I'm feelin' like somebody else already knows  
Oh, my God, I love you boy so much but to have to choose between the two,  
Is hurting me so deep inside Should've never told you that I cared about you  
Didn't think that it would be so bad  
Should've never kissed you  
Should've never held your hand I don't ever want to feel this way again Should've never told you that I cared  
about you  
Should've never kissed you, should've never held your hand Should've never told you that I cared about you  
Should've never kissed you  
Should've never held your hand Should've never told you that I cared about you  
Should've never kissed you  
Should've never held your hand Should've never told you that I cared about you  
Should've never kissed you  
Should've never held your hand Should've never told you that I cared about you  
Should've never kissed you  
Should've never held your hand  
Should've never held your hand
