

Eyes Wide Shut

[Hale](#)

Eyes wide shut, stuck conscious
I can't sleep 'cause I'm with you
I can feel your skin go through my soul
While yours is somewhere else But you, you never saw me there with you
No you don't have a clue Eyes wide shut, action cut
I can't sleep 'cause I'm with you
I can feel your skin go through my soul
While yours is somewhere else But you, you never saw me there with you
No you don't have a clue All I have is all I need but all you want is all I'm not
And you can't see that all I'll be is someone who just loves you when you're there All eyes can see through
May you bet things can't go wrong while you're with me But I lie** All I have is all I need but all you want is all
I'm not
And you can't see that all I'll be is someone who just loves you when you're there
