The Battle

Fort Minor

These hungry rappers battle for a buck and some change
There really be kids starving give a fuck if it change
Shock rap not that, you get signed you might blow up
Release party in Iraq you might blow up
I see you trying to think a few lines you might get at me with
Slap happy with babies who're born with crack in they cribs
Too much to cram under you over sized titled
And the public system failed you either you ignore it
