Follow The Lights

Ryan Adams

These very moments as they pass
It?s like you?re just dreaming of busting someone else
My hands they hold a candle to the pages
These days they go so fast, these days of ours
Follow the lights that line the streets
Connecting telephones
Follow the lights from house to house
And they will lead you home
They will lead you home
?Cause there was never anywhere to go
There was never anywhere to go
But home
If every second here is true
Our love is strong enough to guide the way and we'll walk through
Hands inside of hands, hearts inside of hearts
Like eyes closed, side by side and through
Follow the lights that line the streets
Connecting telephones
Follow the lights from house to house
And they will lead you home
They will lead you home
?Cause there was never anywhere to go
There was never anywhere to go
But home
If everything we are is real
Our memories are attics in those houses on the hill
Our love is there above us holding everything so still
And we are always here, yes, we are always here
So follow the lights that line the streets
Connecting telephones
Follow the lights from house to house
And they will lead you home
They will lead you home
?Cause there was never anywhere to go
There was never anywhere to go
There was never anywhere to go
But home, home
