

Even If

Ella Eyre

Took it all for granted
I know what I did, and what I became
But even you, you did some damage with all of those things that you used to say
It's funny how the bigger deal is small enough, smaller then it was before
But maybe now I figured out that all that we could talk about was wanting more
But even if we never find the time
Oh, and even if we never get it right
I know I'm glad I was able to be by your side
And even if the stars can't align
You know where I am
You know where I am
You never had it easy, you have your ways, and I sure have mine
But only you could ever see it, see through the walls that I hide behind
It's funny how the bigger deal is nothing how, nothing how it was back then
But if only I had realised that all that we would compromised was all we had
Oh, but even if we never find the time
Oh, and even if we never get it right
I know I'm glad I was able to be by your side
And even if the stars can't align
You know where I am
You know where I am
Oh, but all that could matter is still somewhere here
The pieces were shattered, but some are still near
And I said I will never hold onto you, but you hold onto me
And even if we never find the time
Oh, and even if we never get it right
I know I'm glad I was able to be by your side
And even if the star can't align
Oh, and even if the stars can't align
