

Never Say Never

Shame-On-U

the pressure inside me could blow up my head
deep inside me I wish they would drop dead
to avoid hazards be friendly instead
never say neverthere's always a chance it will work out alright
your life may be dark but always shine light
you can decide when hard times are over
just remember never say neverfeed me with energy to get through this
regretting the times so deeply I've missed
whispering the words on my personal list
never say never
