Cry

Monster Magnet

Love lies in pools of questions

Love stays away from me

Love dies and there's no question

I'm gone baby, I'm all the way goneCall me your lousy father

Call me your demon king

Call me your new tornado

Right here baby, together we stayI don't think I can feel any longer

I only know that the voids getting stronger

The only time that it's real is when you cryHere's a torch to burn your cancer

Here's a hand to fill the hole

Lost souls need simple answers

It feels good to do what you're toldI don't think I can feel any longer

I only know that the voids getting stronger

The only time that it's real is when you crySo leave the mirror and love yourself

My sweetest baby has gone to hell

I hear your heartbeat, your eye is a shrine

I drink your teardrops, now burn me aliveThe sky splits open, and the ocean swells

If you're in limbo, then I'm in hell

So leave the mirror and love yourself

My sweetest baby has joined me in hellShe join me in hellI don't think I can feel any longer

I only know that the voids getting stronger

The only time that it's real is when you cryI don't think I can feel any longer

I only know that the voids getting stronger

The only time that it's real is when you crySo leave the mirror and love yourself

My sweetest baby has gone to hell

I hear your heartbeat, your eye is a shrine

I drink your teardrops, now burn me alive
