

Universal Race

Theatre of Tragedy

The pulsing of the flare reflected in the air
Stick-stuck goggles deflecting the stare
Underground, overdrive, countdown
Take off, we're gone, they're here
Head for planets far and near Don't know what upsets you
We're gonna take you to the outer space
Find planets, red, blue, let's make a universal race Don't know what upsets you
We're gonna take you to the outer space
Find planets, red, blue, let's make a universal race We're gonna take you to places never seen
A rigid-like gesture since we were nineteen
Inner space, outer space, head off, head on
Slot in, interface, bounce back and forth like electrons We're gonna take you to planets never seen
Solar systems run by machines
Out of code, out of code, crash, reboot the machine
Redo from start, who is he? Don't know what upsets you
We're gonna take you to the outer space
Find planets, red, blue, aha, let's make a universal race Don't know what upsets you
We're gonna take you to the outer space
Find planets, red, blue, aha, let's make a universal race We're gonna take you to planets never seen
Solar systems run by machines
Out of code, out of code, crash, reboot the machine
Redo from start, who is he? Don't know what upsets you
We're gonna take you to the outer space
Find planets, red, blue, let's make a universal race Don't know what upsets you
We're gonna take you to the outer space
Find planets, red, blue, let's make a universal race Don't know what upsets you
We're gonna take you to the outer space
Find planets, red, blue, let's make a universal race Don't know what upsets you
We're gonna take you to the outer space
Find planets, red, blue, let's make a universal race
