

# Recipe

**Ikue Mori**

Hold me like I'm a baby  
I will always be safe in your arms  
I'm filming and I'm dreaming  
I'm humming my way to the stars  
I can reach the stars from where I am  
I can reach the stars from where I am  
Tell me what is the recipe, secret of eternity  
No more love me or leave me  
Not a year not three or four  
Forever is in my heart with you evermore  
Stand by me I am your baby  
You will always be safe in my arms  
This season I don't think about reason  
I just wanna lose it and wish upon the star  
I can reach the stars from where I am  
I can reach the stars from where I am

Tell me what is the recipe, secret of eternity  
No more love me or leave me  
Not a year not three or four  
Forever is in my heart with you evermore  
We can take it far, to the morning star  
A thousand children laughing in your eyes  
You were made for me, baby can't you see  
The endless sky is filled with butterflies  
Tell me what is the recipe, secret of eternity  
No more love me or leave me  
Not a year not three or four  
Forever is in my heart with you evermore  
Tell me what is the recipe, secret of eternity  
No more love me or leave me  
Not a year not three or four  
Forever is in my heart with you evermore
