

# Under

## Ellen Allien & Apparat

Callin' my river to let her know  
I'ma be on my way  
Missin' how the river flow even though  
It's only been a couple of days  
'Cause it be raining and complaining you  
Got that water made for drinking up  
Baby if I drown tonight it's all worth it for you  
I don't need no rescue  
I'ma hold my breath until you feel it in your chest  
When I go under, under  
I ain't coming up until you scream and knock it off  
When I go under, under  
You be making waves, my ship's here to stay  
I got what it takes to swim up in it all day  
I want you to shake it, later tell me it was great  
When I go under, under  
Girl relax, captain can handle that  
I'ma take this cruise real slow  
Heading to paradise, close your eyes  
All you gotta do is let it go  
The way your body flow, it's a private show  
And I can't stop until it's spilling over  
It's a sight to see you and it's calling me  
Telling me your body's getting closer  
I'ma hold my breath until you feel it in your chest  
When I go under, under

I ain't coming up until you scream and knock it off  
When I go under, under  
You be making waves, my ship's here to stay  
I got what it takes to swim up in it all day  
I want you to shake it, later tell me it was great  
When I go under, under  
I'm jumping in, no lifesaver  
Don't know when I'm coming up  
Deep sea diving in your treasure  
I'm giving you all this pleasure  
Ooh girl, I'm so into you  
So deep I don't know what to do

Just let the water flow  
Till the tidal wave washes us ashore  
I'ma hold my breath until you feel it in your chest  
When I go under, under  
I ain't coming up until you scream and knock it off  
When I go under, under  
You be making waves, my ship's here to stay  
I got what it takes to swim up in it all day  
I want you to shake it, later tell me it was great  
When I go under, under  
Under, under  
Under, under
