Mindfields

The Matrix Soundtrack

There's a rumour of a midnight man
So silent in disguise
And every time he looks your way
You can see it in his eyes
Like a window to the storm
He just invades your paradise
Don't you buy what he is selling
It's just lies
When he says
"These hearts are willing"
The story goes
That these dreams are free
Only takes a moment
But you must acclimatize
Don't you buy what he is selling
It's just lies
Over your left shoulder I have seen the angry beast
Heard the war horn screaming, as they gather for the feast
Seen a star-crossed angel with the death-card and a shield
We're walking through mindfields
You see an angel as she takes you by the hand
We're walking through mindfields
Her lips are moving like she's praying
We're walking through mindfields
She speaks so softly and you want to understand
What she's saying
There's a stairway leading to the sun
I walk it in my sleep
And a ship of fools above the sky
Who've gotten into deep
With a doorway into nowhere
And the path is way too steep
Don't loose your angry soul
It's yours to keep
Where it ends
It's the beginning
And it stays
Right to the end
The reason is unclear my friend

It almost makes me weep
So don't loose your angry soul
It's yours to keep
Over your left shoulder I have seen the angry beast
Heard the war horn screaming, as they gather for the feast
Seen a star-crossed angel with the death-card and a shield
We're walking through mindfields
You see an angel as she takes you by the hand
We're walking through mindfields
Her lips are moving like she's praying
We're walking through mindfields
She speaks so softly and you want to understand
What she's saying
Over your left shoulder I have seen the angry beast
Heard the war horn screaming, as they gather for the feast
Seen a star-crossed angel with the death-card and a shield
We're walking through mindfields
You see an angel as she takes you by the hand
We're walking through mindfields
Her lips are moving like she's praying
We're walking through mindfields
She speaks so softly and you want to understand
What she's saying
We're walking through mindfields
You see an angel as she takes you by the hand
We're walking through mindfields
Her lips are moving like she's praying
We're walking through mindfields
She speaks so softly and you want to understand
What she's saying
