Afterglow

Vertical Horizon

I wasn't sleeping... I wasn't dreaming... I kept my head down, I kept my head down..
I wasn't laughing.. I think I was crashing.. Coz I always fall down, I always fall down..
Now everything I've ever known just fades into the the afterglow
This light surrounds you, and the light pulls me through
and even though the best is gone, I've got you here-I'm holding on
Look up from below
and stay with me here in the afterglow
I wasn't breathing.. my heart had stopped beating.. Frozen in time, frozen inside.
Now everything I've ever known just fades into the the afterglow
This light surrounds you, and your light pulls me through
and even though the best is gone, I've got you here-I'm holding on
Look up from below
and stay with me here in the afterglow

You saved me from this hiding place
where I waste away
You take this winter's night into
a perfect summer's day..
Now im believing.. The pain is receding..
you're like water to wine
water to wine..
Now everything I've ever known just fades into the the afterglow
This light surrounds you, and the light pulls me through
and anywhere you wanna go I'll take you there, just let me know
stay with me here
stay with me here
just stay with me here in the afterglow
