Stay

Jakwob

Stay now
I know it's safe now
Thunder and rain clouds
Are drifting away
Oh come soon

You could go
But then you would have to try and fight the cold
All by yourself
You could leave
But you know deep down your heart is set with me
The clouds will clear in time

Stay now
I know it's safe now
Thunder and rain clouds
Are drifting away
Oh come soon

4x
You might think that the rain will clense you
Drown your worries and wash your fears away
But the grey skies will all soon turn blue
And tomorrow will be a brighter day

Stay now
I know it's safe now
Thunder and rain clouds
Are drifting away
Oh come soon
