Under the Sun

Ryan Peters

Yesterday I read the word
I remember everything I heard
Every word on every page
Told me you love me but I need a change
My beating heart was paralyzed
Give me a chance now I realized
We're in this thing forever
We're better of together so always knowAnywhere under the sun, I'll follow you
We're all in a place and we're just passing through
You'll be the one that will take me home
There's a part of you here so I am never alone
And I'll find you with me anywhere under the sunYou work in circles, recycle me
And I'm become everything you need
Time is here and gone again
Beautiful stories that'll never endWe're all made for something greater
But sometimes we forget which way is upAnywhere under the sun, I'll follow you
We're all in a place and we're just passing through
You'll be the one that will take me home
There's a part of you here so I am never aloneYou'll be the one that will take me home, back to the light
The one that will take me home, back to the lightYeah we're in this thing forever
We're better off together so always knowAnywhere under the sun, I'll follow you
We're all in a place and we're just passing through
You'll be the one that will take me home
There's a part of you here so I am never alone
And I'll find you with me anywhere under the sun
