

# Long Time Comin'

[John Hiatt](#)

Friend of mine said a long time comin', been a long time gone  
Stood right here, whispered in my ear, all the love gone wrong  
I've been living my life like a howlin' wind and I can't put out this flame  
Friend of mine said a long time comin', comin' back again All this time the wheels been turnin', turnin' like a  
screw  
Down some roads of silver and gold but I could never find you  
Been livin' my life like a lonesome whistle blowin', now I can't turn back  
Friend of mine said a long time comin', comin' down the track And if I told it true, all these memories of you,  
well that's why I play the game  
Friend of mine said a long time comin', like it never came I've sang these songs a thousand times, ever since I  
was young  
It's a long time comin' and the drummer keeps drummin', your work is never done  
I still see you there in that silver blue air and I never have moved on  
Friend of mine said a long time comin', I'm just a long time gone  
Friend of mine said a long time comin', I'm a long time gone
