## **Hot Night Crash**

## **Sahara Hotnights**

We've been here before
We're stuck and I'm halfway trough your door
I've said it before

Listen, this is the last time we won't fool ourselves no more Been at it for days

We are brand new but we're already set in our ways

I find it hard to believe

We fall to pieces way too easilyGot our hands on the action We've been trying really hard to find

> Since we got stuck on all the love and affection It's getting harder for us every time

> > I wonder why

We have to tell each other lies

Maybe our heartache never dies with the hot night crash

You'll hear it tonightSome call it doubts

Too hard to tell me it's all over and out

In the back of my head

I heard you say it tried to beat you to it instead

Wish I could be sure that we don't work

Could I leave you and all your

Halfway trough the door

My eyes shut my shoes nailed to the floorGot our hands on the action

We've been trying really hard to find

We got stuck on all the love and affection

It's getting harder for us every time

I wonder why

We have to tell each other lies

Maybe our heartache never dies with the hot night crash You'll hear it tonightGive us something worth saving when we're done crying

This time I couldn't keep him and I wasn't trying

Oh baby drop your worrying it's over

And no we don't need only time to recoverWhy

We have to tell each other lies

Maybe our heartache never dies with the hot night crash

You'll hear it tonight

We have to tell each other lies

Maybe our heartache never dies with the hot night crash

You'll hear it tonight

We have to tell each other lies

## Maybe our heartache never dies with the hot night crash You'll hear it tonight
