

# With All My Might

## Sparks

The mountains may crumble  
And cover the road to you  
But I'll fight to break on through  
With all my might  
The ocean may rise up  
And wash you away from me  
But I'll bring you back, you see  
With all my might  
With all my might I'll fight the dragons  
That hang around you night and day  
And when I see your spirit's sagging  
I'll hype you up in my own way  
The noise of my heartbeat  
May cover the words I say  
But I'll scream and have my say  
With all my might  
With all my might I'll fight the dragons  
That hang around you night and day  
And when I see your spirit's sagging  
I'll hype you up in my own way  
But you're independent  
And maybe you'll leave someday  
I'll try to say that's okay  
With all my might  
The perfect invention  
Is something that keeps you here  
And I aim to keep you here  
With all my might  
I know that it's shaky  
I hope I'm not history  
I want you to stay with me  
With all my might
